System Name:　　　　Scholarship Management System (SMS)

Description:　　　　SMS is a web-based application especially built for all UP-funded scholarships for UP Faculty and Staff, including those who are studying abroad. This system will process data for both application and monitoring of students. It will also serve as the database for all the information submitted by the applicants and scholarship grantees.

Use-Case Diagram:

List of Actors:

Actors	Description
Student	The intention of the application is to allow the student to manage his forms for application, accomplishments and financial reports. In addition, students can also view his scholarship status (if maintained or not) after the committee has reviewed his recent reports.
OVPAA	The OVPAA will be the one to review the students' application forms, and status reports.

List of Use-cases:

Use-Case	Description
Use-Case 1.0 Manage Profile	This use case describes how the student interacts with the application. Once a student logs in, he may choose to update his profile with his recent accomplishments and financial reports or view the status of his scholarship.
Use-Case 1.1 Update Profile	The scholarship grantee can update his/her profile by logging in to the web application. The student can change personal information except for name and student number. The student can also update his/her accomplishments and financial status.
Use-Case 1.2 View Scholarship Status	The student submits his application for a scholarship. Once screened by the selection committee, he may qualify for a scholarship. Over the course of his program, he may view the status of his scholarship after the committee has reviewed his recent reports.
Use-Case 2.0 Review Application	This use case is one of the major functionalities of the program, wherein the OVPAA personnel reviews all existing applications. After all application forms have been received, it will be checked for completeness and the review committee then verifies if the applicant meets all the scholarship requirements. After this, all eligible applicants are assessed to determine who qualifies for a scholarship grant.
Use-Case 3.0 Review Accomplishments	This use case includes the conditions that will determine whether the scholarship grantee will continue getting benefits or not. The grantee's scholarship will be kept if he/she has done a good performance during his/her studies. Otherwise, he/she will receive a warning that he/she needs to improve his/her studies. If the student gets a 2nd warning, his/her scholarship will be removed.
Use-Case 4.0 Review Financial Reports	Once the student logs in to the web application and submits a comprehensive and detailed report about his finances, the review committee assesses the report submitted by the student. The OVPAA determines if finances are well-managed and makes decisions on special financial grants.
